

Practice check up

Free in-house review, training & development for your community mental health organisation's workforce & practice.

The Western Australian Association for Mental Health is offering a complimentary tailored Organisational Development Program with targeted training, thanks to funding from the Mental Health Commission.

Our experienced Mental Health Learning and Development Facilitator will work with your organisation to identify practice and capacity building needs to meet your goals and essential sector skills, while facilitating practice conversations, where real service scenarios can be explored.

A learning and development program will be designed and may comprise one or a combination of short training sessions within WAAMH's scope, practice discussions, and post delivery support.

BOOK YOUR CHECK UP NOW!
