

Capabilities Assessment Mapping Tool

Capabilities Assessment Mapping (CAM) is a visual format of the WAAMH Readiness Workbook for the National Disability Insurance Scheme (NDIS) Practice Standards and Quality Indicators Core Modules.

The aim of CAM is to increase accessibility of this information for psychosocial service providers. Plus:

- Provide quality support for registered psychosocial disability service providers navigating the NDIS framework;
- Within each quality indicator, identify standard driven evidence and its implementation into everyday practice and/or identify areas of required improvement; and
- Assist service providers with meeting NDIS obligations/compliance and be audit ready.

Suggested CAM Tool use

- For service improvements and preparation for NDIS auditing
- In combination with the [WAAMH Readiness Workbook for Core Modules](#)
- Digital service information input in the relevant standard/indicators sections
- Or print multiple copies of relevant standard/indicators as hard copies into which information can be inserted.
